Job Title	Quality Assurance — Master-Level Internship
Job Description:	About the Role: We are looking for a detail-oriented and analytical Quality Assurance (QA) Intern to join our team. This role is ideal for a Master's level student with a passion for ensuring software quality and reliability. As a QA Intern, you will work closely with our development and product teams to test and validate software, ensuring it meets the highest standards before release. Key Responsibilities: • Develop and execute test plans, test cases, and test scripts for various software applications. • Identify, document, and track defects using issue tracking tools • Collaborate with developers and product managers to understand requirements and ensure comprehensive testing. • Perform functional, regression, and performance testing on software products. • Analyze test results and provide feedback to the development team. • Contribute to the continuous improvement of testing processes and methodologies. • Participate in team meetings to discuss project progress and QA strategies.
Requirements:	• Currently enrolled or recently graduated from a Master's program in Computer Science, Software Engineering, or a related field. Master's program enrollment or completion is mandatory. • Strong understanding of software testing principles and methodologies. • Experience with manual testing; familiarity with automated testing tools is a plus. • Excellent analytical and problem-solving skills. • Strong attention to detail and a commitment to quality. • Ability to work both independently and as part of a team. • Proficiency in issue tracking tools (e.g., Jira) is an asset. • Effective communication skills, both written and verbal. • Language: English

Application method: Please send your resume to: mcarter1661@gmail.com
